7. Item-wise H-1 bid (the highest bid) will be eliminated during price bid opening, if more than four techno-commercially acceptable bids are available and H-1 bidder (the bidder who has quoted the highest net landed cost/price) will not be able to participate in the Reverse Auction for that item. If two bidders have quoted the same H-1 net landed cost/price, the bidder who had submitted/ frozen the bid later, shall be rejected and will not be able to participate in Reverse Auction. However, H-1 elimination will not be applicable to the preferential category of bidder like MSEs, Make In India, Ancillaries, Domestically Manufactured Electronic Products (DMEP) and other preferential category of bidders notified by Government of India from time to time.

8. The L-1 bidder after the reverse auction has to upload the breakup of net Landed Prices online through confirmatory link. The detailed breakup of offered net landed price, uploaded by the bidder shall be considered and order, if placed, shall be with the same breakup of prices. While giving the break up, the bidder will not be allowed to increase the initial quoted rate of any component. The composite price may be either equal to the price offered in reverse auction or less. The L-1 bidder after reverse auction will be responsible to ensure that the net landed rate as per the breakup of prices provided by him after the reverse auction and the L-1 net landed rate offered by him in the reverse auction is the same or less, otherwise it may be treated as withdrawal of offer and will attract penal action. The bidder will also have to consider same rate of taxes and duties as quoted while submitting the e-price bid.

9. To evaluate the net landed price for determining the L-1 bidder in different kinds of tenders, the evaluation criteria would be as elaborated in clause-13.3.3 of Purchase Manual Coal India Limited 2020.

10. The decrement value will be 0.5 % of the start bid price with minimum of Rs.1.00, as the present e-procurement system does not have a provision of taking amounts less than Rs.1.00 as decrement value. The reduction shall have to be made as per decrement value or in multiple thereof. The maximum seal percentage in one go will be fixed as 2% over and above the normal decrement of 0.5% i.e. 2.5% of the start bid price or the last quoted price during reverse auction, whichever is lower. This shall be worked out as under:

\[ DV_1 = (DV + 0.02 \times L-1) \]

Where, \( DV \) = Decrement Value (fixed) as indicated in NIT

\( DV_1 \) = Maximum range of decrement (Bidders can offer reduction in multiples of \( DV \) within this range)

\( L-1 \) = Start Bid Price or Current Lowest Price as displayed during reverse auction.

If the start bid price is Rs.21000 and decrement value is Rs. 100, the maximum seal percentage will be 2% of 21000 i.e. Rs.420 and upper range of reduction shall be Rs.520 (100+420). However, as reduction has to be in multiples of decrement value, maximum reduction that can be offered by the bidder will be Rs. 500 only and hence, first reduced bid in reverse auction cannot be below Rs.20500.

In the above scenario, the seal percentage for 2nd bid will be 2% of 20500 i.e. Rs.410 and the upper range of reduction shall be Rs.510 (100+410). Thus, maximum reduction that can be offered will again be Rs. 500 only in multiples of Rs. 100 (decrement value).

In order to have ease of submission of reverse auction bid by the bidders, decrement value may be rounded off to nearest value as under:
a). For decrement values up to Rs.10/-, rounding off may be made to nearest rupee.
b). For decrement values from Rs. 11/- to Rs. 100/-, rounding off may be made to nearest 10.
c). For decrement value from Rs. 101/- to Rs. 1,000/-, rounding off may be made to nearest 100.
d). For decrement value from Rs.1,001/- to Rs.10,000/-, rounding off may be made to nearest 1000.
and so on............

For cases where the unit rate is low and quantum of item is huge, if the decrement value in terms of 0.5% works out to be in paisa and rounding off to nearest rupee, would be much higher than 0.5% of start bid value, the unit of measurement may be adjusted in such a way so that decrement value may remain in the range of 0.5% or Rs.1.00 whichever is higher.

For example, Tender for any item, whose unit of measurement is in Kg and having low unit rate may be invited in terms of 10 Kg or 100 Kg, as may be considered appropriate, as unit of measurement.

11. Reverse Auction will be initiated within two hours after opening of price bids. Initial period of reverse auction will be two hours. There will be auto extensions of time every time by twenty minutes in case of any reduction recorded in the last ten minutes. In case of reverse auction in two bid system, Auto Extension of time will be thirty minutes in case of any reduction recorded in the last thirty minutes. The reverse auction will come to a close only when there is no further reduction recorded in the last ten minutes or thirty-minute slot, as applicable for the auto extensions of time.

12. System provides bidder details along with bid documents at the end of reverse auction process. The log details of the entire reverse auction process will be generated by the system once the process of reverse auction is completed.

13. If a bidder does not submit his bid in the Reverse Auction, the price quoted by him in the initial price bid shall be considered as the valid price of that bidder. The status of the bidder (L-1, L-2 etc.) shall be evaluated considering either the bid price submitted in Reverse auction or the Price quoted in the price bid, whichever is lower.

14. Since, reverse auction is a sequel to e-tender, the process of finalizing the tender upon completion of reverse auction will be the same as the tender process without reverse auction.

15. Business rules like event date, time, methodology of start bid price and bid decrement value, extensions, etc. also shall be indicated in NIT for information of bidders.

16. The bid history shall reflect only the net landed price. The net landed price shall also not be same for two bidders even if any bidder makes such an attempt. Net landed price can be the same for two bidders only in case where after e-procurement, none of the qualified bidders participated in the Reverse Auction.

17. Only the chronologically last bid submitted by the bidder till the end of the reverse auction shall be considered as the valid price bid of that bidder and acceptance of the same by BCCL will form a binding contract between BCCL and the bidder for entering into a contract. Any bid submitted earlier during reverse auction process by the bidder prior to submission of his last bid will not be considered as the valid price bid.

18. Purchase Preference: If any of the short-listed bidders are eligible for purchase preference as per Government policy, such bidders would get opportunity to match the L-1 prices concluded after reverse auction, if their final prices in Reverse Auction fall within the permitted percentage and they are otherwise eligible. This will also be applicable to MSEs, Make In India, Ancillaries and other preferential category of bidders notified by Government of India from time to time.
19. Conversion Rate: The exchange rate prevailing on the price bid opening date, shall be fed to the system by the TIA during opening of the price bid. The data may be obtained from RBI/ SBI website or directly from Banks.

20. Server time shall be the basis of Start time & Closing time for bidding and shall be binding for all. This would be visible to all concerned.

21. On expiry of the closing of the reverse auction, the bid history showing all the last valid bids offered along with name of the bidders shall be published. All bidders shall have the facility to see and get a print of the same for their record.

22. If the lowest price received during reverse auction is unreasonable or it is unacceptable on ground of being too high or too low compared with estimated price, LPP etc., the management reserves right to seek justification of the price from the lowest bidder. If the price is not considered reasonable, management may not accept such bid and go for another tender process.

23. In case of disruption of service at the service provider’s end while the RAP is online, due to any technical snag or otherwise attributable to the system failure at the server end, the RAP process will start all over again. In such a situation, the last recorded lowest price of prematurely ended RAP, will be the 'Start Bid' price for the restarted RAP. The prices quoted in the prematurely ended RAP will be binding on all the bidders for consideration, if the restarted RAP does not trigger within the stipulated time. A provision to this effect should be made in the NIT.

Disruption and restarting of RAP shall be intimated to all the bidders through system/SMS/ e-mail through e-procurement portal. All the time stipulations of normal RAP will be applicable to the restarted RAP.
